Professional Summary

UX / UI Designer with medical coding and billing experience. I gained professional strength going up against big insurance companies fighting for patient's maximum rights and benefits. Recognized by the Donna Lowrey award for going above and beyond my job description, two years in a row from Ernest Health, Inc.

I made the decision to complete the UX/UI Bootcamp at the University of Texas because I believed combining my coding knowledge with my love of design, gaming, and development was the right path to take. My passion for building responsive web designs, and capability to never forget who I am designing for allows me to create user-friendly products excelling in UX/UI Design.
